

NCRA ARTIFICIAL INTELLIGENCE (AI) POSITION STATEMENT

As adopted by the NCRA Board of Directors

February 24, 2026

NCRA remains committed to ensuring the official record is created directly from the court reporter's and/or captioner's own work product.

We recognize the potential of Artificial Intelligence (AI) as a supplemental tool but firmly hold the position that AI or Automatic Speech Recognition (ASR) technologies cannot replace a trained, certified, impartial human court reporter and/or captioner in the creation, preservation, and certification of the official record. Human oversight is essential to ensure accuracy, context, reliability, and ethical stewardship of the record.
